ANAND LILHARE

AI-FIRST ANDROID DEVELOPER | ANDROID TECHNICAL LEAD

+91 7559306971 | anandlilhare69@gmail.com | LinkedIn | GitHub | Pune, India

PROFESSIONAL SUMMARY

AI-First Android Developer and Technical Lead with 11+ years of experience designing, architecting, and delivering scalable Android applications using Kotlin, Java, Jetpack Compose, MVVM, MVI, and Clean Architecture. Experienced in leading Android engineering teams, driving architecture decisions, establishing engineering standards, and coordinating delivery across product, architecture, and QA. Hands-on experience integrating Generative AI capabilities into Android applications, including on-device and cloud-based AI, and using AI coding assistants such as Cursor AI, GitHub Copilot, and Gemini. Applied Spec-Driven Development (SDD) with OpenSpec during AI-assisted development of an Android authentication system. Additional expertise includes modular Android development, WebView-based Micro-Frontend integration, BLE/IoT applications, mobile CI/CD, and production stability.

TECHNICAL SKILLS

Programming: Kotlin, Java, JavaScript, TypeScript

Android Development: Android SDK, Jetpack Compose, ViewModel, LiveData, Navigation, Room, WorkManager, DataStore, Paging 3, WebView/JavaScript Bridge

Architecture & Leadership: Clean Architecture, Modular Architecture, MVVM, MVI, MVP, SOLID, Repository Pattern, Technical Leadership, Mentoring, Code Reviews, Agile, Scrum

Kotlin & Concurrency: Kotlin Coroutines, Flow, StateFlow, Reactive Programming

Networking & APIs: Retrofit, OkHttp, REST APIs, GraphQL, JSON Parsing, Secure API Integration

Dependency Injection: Hilt, Dagger 2

Data & Firebase: Room, SQLite, SharedPreferences, Firebase Authentication, Firestore, Realtime Database, FCM, Crashlytics

Testing & Quality: JUnit 4, AndroidJUnitRunner, Mockito, MockK, Robolectric, Espresso, Jetpack Compose Testing, SonarQube

Performance & Security: Android Profiler, LeakCanary, ProGuard, R8, SSL Pinning, Encrypted Storage, OWASP Mobile Awareness, RASP

CI/CD & DevOps: Fastlane, Jenkins (CloudBees), Gradle, Bitbucket, Jira, Confluence, Bash, Groovy

AI & Cross-platform: Generative AI Integration, On-device AI, Gemini Nano, Firebase AI Logic, OpenAI API, AI-assisted Development (Cursor AI, GitHub Copilot, Gemini, Codex), Spec-Driven Development (SDD), OpenSpec, Kotlin Multiplatform, React Native

Hardware & IoT: BLE, iBeacon, Android Wear, OCR SDK, Image Processing.

PROFESSIONAL EXPERIENCE

Software Designer (Mobile Lead) | *Globant, India*

Dec 2023 – May 2026 | Pune, India

• Led an 8-member Android engineering team delivering enterprise banking solutions for the Banco de Sabadell platform using Kotlin, Jetpack Compose, and Clean Architecture.

• Integrated LegacySDK into the new Sabadell application using the Facade design pattern, enabling access to legacy capabilities within the new application architecture.

• Architected and maintained WebView-based Micro-Frontend integration with Angular modules, defining native-to-web and web-to-native bridge communication for event handling and shared application state.

• Drove solution architecture decisions and architecture governance, promoting multi-variant modular structures to improve application scalability and code reuse.

• Improved feature development and legacy-refactoring productivity by approximately 30% through AI-assisted development tools, including Cursor AI, GitHub Copilot, and Gemini.

• Worked with Product Owners, Principal Architects, QA leads, and other stakeholders to manage dependencies, technical scope, delivery roadmaps, and sprint execution.

• Strengthened code quality through peer reviews and engineering standards, and addressed application bottlenecks to help sustain a 99.9% crash-free rate.

Assistant Consultant (Tech Lead) | *TATA Consultancy Services (TCS), India*

Jul 2021 – Dec 2023 | Pune, India

• Coordinated client technical requirements, delivery roadmaps, and end-to-end rollout schedules for the internal Mobile DevTool platform initiative.

• Automated deployment workflows and application build distribution using Jenkins and Fastlane CI/CD pipelines, reducing manual deployment overhead by approximately 40%.

• Introduced automated SonarQube static code analysis, supported unit-testing practices, and addressed architectural technical debt to improve codebase quality.

• Managed multi-vendor coordination and stakeholder communication across globally distributed Agile/Scrum teams.

• Contributed to technical hiring through screening interviews and supported architecture reviews and developer mentoring.

Senior Software Engineer | *Cuelogic Technologies Pvt. Ltd., India*
Jan 2017 – Jun 2021 | Pune, India

- Engineered robust Android applications for Blackline Connect interfacing directly with hardware BLE sensors and spatial iBeacon IoT frameworks.
- Architected scalable, offline-first MVVM application patterns leveraging Kotlin Coroutines, Kotlin Flow, and Android Jetpack local database modules.
- Optimized application health parameters and traced production runtime exceptions using Firebase Crashlytics, bringing stability past target metrics.

Android Developer | *Appnocrat Technology Pvt. Ltd., India*
Mar 2015 – Dec 2016 | Pune, India

• Developed native Android applications using Java and MVP architecture for the Predictable mobile application.

• Managed Google Play Store release workflows, production variant configurations, and high-priority hotfix deployments.

NOTABLE PROJECTS

- **Banco de Sabadell (Kotlin, Jetpack Compose, Hilt, Facade Pattern, Fastlane, CI/CD) —** Enterprise mobile banking application supporting account management, fund transfers, bill payments, and biometric authentication for 1M+ users. Contributed to legacy capability integration and automated build/release workflows.
- **Mobile DevTool (Jenkins, Fastlane, CI/CD, SonarQube) —** Internal enterprise tooling initiative focused on application build distribution, deployment automation, and engineering quality checks**.**
- **Loner Mobile (Kotlin, Java, Android, MVVM, Data Binding, LiveData, BLE, iBeacons, Android Wear, Location Services, Firebase Crashlytics) —** Lone-worker safety monitoring and industrial Android application. Blackline reports monitoring 60,000+ employees across 50+ countries; this is company-level context, not an individual project usage metric.
- **Blackline Connect (Kotlin, Android Jetpack, MVVM, BLE, iBeacon, Firebase Crashlytics)** — Connected-workforce safety application integrating Android devices with body-worn BLE sensors and spatial iBeacons for location and incident monitoring.
- **Predictable (Java, MVP, Dagger 2, Crashlytics, Google Play Store) —** Paid AAC communication application currently listed at ₹8,950, with 1,000+ downloads and editions in English, Swedish (Predictable Svensk - AAC), and German (Predictable Deutsch - AAC). Contributed to complex UI development, production support, and release lifecycle management.

.

CERTIFICATIONS

- DevOps Engineer — edureka! (Grade A), Certificate ID: L23NVEUK8, March 2023

PUBLICATIONS / WRITING

- On-Device AI for Android: Getting Started with Gemini Nano
- How to Integrate Cloud-Based Gemini AI into Android Using Firebase

EDUCATION

Master of Computer Applications (MCA)
Rashtrasant Tukadoji Maharaj Nagpur University | 2010 – 2013

Bachelor of Computer Applications (BCA)
Rashtrasant Tukadoji Maharaj Nagpur University | 2007 – 2010

LANGUAGES

English (Professional) • Hindi (Fluent) • Marathi (Native)
